1. Welcome to Mentivo

You are now officially part of Mentivo's verified mentor network—an elite community of IIT students step-changing how JEE aspirants access high-quality, relatable strategic guidance. As a mentor, you bridge the immense gap between raw textbook preparation and the battle-tested execution strategies that secure top ranks.

This handbook serves as your primary reference manual. It comprehensively outlines how our mobile ecosystem works, how your earnings scale, and the foundational standards of professionalism and conduct required to sustain trust across our platform.

2. App Walkthrough & Core Operations

The Mentivo Mobile App puts full control over your schedules and earnings into your pocket. Understanding its mechanical pillars ensures optimized visibility and friction-free session fulfillment.

Availability Toggle

Switch yourself **“Online”** when you are ready to actively accept incoming voice/video call requests, and **“Offline”** when unavailable. Only online mentors receive real-time queries. Ensure you toggle off during lectures, labs, exams, or sleep.

Note: Missing calls while toggled online dynamically affects platform visibility parameters.

Receiving & Accepting Calls

When a student initiates a request, you will receive an instantaneous notification displaying their specific problem query or subject domain. Accept promptly to jump straight into the session.

There is no direct structural penalty for occasionally letting a call pass if you are occupied, but **rapid acceptances** systematically elevate your rank in our matching algorithms.

In-Call Screen Dashboard

Once connected, the active panel displays:

- A precise **session timer**
- The student's declared core doubt
- Robust audio/call controls

Keep a consistent watch on the live timer, as payout mechanics are metered accurately to the **exact minute** of engagement.

Earnings, Wallet & Withdrawals

Track real-time financial balances, current per-minute rates, and progress thresholds toward your next tier level directly within the dynamic wallet.

- Payouts available anytime with a minimum threshold of **Rs. 200**
- Fulfilled natively via **Bank Transfer** or **UPI**

2.1 The “Ask” Feature (Pre-Call Engagement)

The “Ask” feature functions as your premier organic marketing asset. Students post condensed, text-based queries, allowing you to establish immediate authority before they transition into booking a premium call.

The Core Objective

Your short answer must stimulate two simultaneous reactions from the student:

1. *“This mentor uniquely understands this exact roadblock”*
2. *“I definitely need to jump on a call to implement the solution.”*

The V-D-I Framework (Max 400 Characters)

Compress your strategic response strictly into 2–3 impact-driven sentences using this high-conversion copywriting formula:

VALIDATE (1 Sentence): Deep, empathetic acknowledgment of the precise cognitive or emotional struggle. Avoid generalized or superficial encouragement.

DIRECT (1 Sentence): A sharp, non-obvious, highly actionable strategic insight. Offer your absolute best point immediately instead of a broad system summary.

INVITE (1 Sentence): A contextual, natural call-to-action seamlessly tied to the precise advice you just provided.

Strict Rules — What to Avoid

- × **No complete mapping:** Do not pack an exhaustive solution into one paragraph. Highlight exactly one powerful, distinct perspective.
- × **Zero filler text:** Eliminate introductory fluff like “Great question!” or “Don’t worry!” — every single character must deliver analytical value.
- × **No generic invitations:** Ban phrases like “Book a call for more details.” Make the invitation an explicit continuation of your chosen insight.
- × **No minor edits for length:** If you exceed the 400-character wall, do not squeeze down words—delete a whole sub-clause or an entire sentence cleanly.

The 10-Second Pre-Submission Self-Check

1. Did I provide an insight that Google or an AI chatbot couldn’t duplicate instantly? (If no → Redesign your **Direct** sentence)
2. Would I personally invest my own money to talk to someone after reading this response? (If no → Sharpen your **Invite** trigger)
3. Did I authentically capture the specific psychological barrier the student is facing? (If no → Trim details to expand your **Validate** context)

3. Compensation & Advancement Structure

Mentivo runs a pure meritocracy. As your volume of sessions scales and your student ratings remain consistently high, your earning potential increases automatically through predefined operational tiers.

Tier	Gross Base Rate	Mentor Revenue Share	Net Mentor Payout
Standard Tier	Rs. 10 / min	70%	Rs. 7.00 / min
Signature Tier	Rs. 15 / min	70%	Rs. 10.50 / min
Fellow Tier	Rs. 20 / min	70%	Rs. 14.00 / min

Financial & Administrative Policies

- **Automatic Tier Advancement:** Progression relies entirely on matching two core pillars tracked live inside your app dashboard: *Total Sessions Completed* + *Cumulative Average Star Rating*. Crossing the baseline automatically scales your per-minute pay.
- **Settlement Cycle:** Earnings are computed automatically and processed on a predictable **weekly rolling cycle**.
- **Minimum Outflow Requirement:** A minimum wallet balance of **Rs. 200** must be present to trigger a manual processing request.
- **Taxation Compliance:** No active PAN card submission or Tax Deducted at Source (TDS) occurs at this specific developmental stage. Mentors are entirely independently responsible for reporting and honoring their personal tax liabilities on all funds generated.

4. Call & Session Performance Guidelines

Every single call is an active professional consultation. Adhering to structured frameworks optimizes session longevity, drives better student performance, and stabilizes your rating average.

- **Session Metrics:** A mandatory minimum duration of **5 minutes** applies per individual session to ensure baseline query mapping. There is absolutely no maximum ceiling; mentors are highly encouraged to stay online as long as the student actively requires guidance.
- **Linguistic Flexibility:** The choice of language is entirely situational. Match the comfort level of the student natively, utilizing clear Hindi, English, or a balanced conversational mix (Hinglish).

Recommended Session Blueprint

1. **Empathy & Intake:** Warmly greet the student and immediately clarify the deep root cause of their specific doubt or roadblock.
2. **Targeted Resolution:** Break down the problem logically. Solve or illustrate clearly, using real-time checks to verify comprehension.
3. **Synthesis:** Summarize the foundational key takeaway or conceptual mindset shift in one clear, final thought.
4. **Retention Hook:** Encourage the student to follow up or book their next milestone session with you explicitly as they progress.

Managing Incidents & Behavioral Misconduct

In the rare event you encounter a rude, hostile, or inappropriate student, **do not engage, argue, or attempt to self-remedy**. Politely state that you are concluding the consultation, hang up immediately, and flag the session history directly to **Platform Support**.

5. Institutional Code of Conduct

Preserving platform trust is non-negotiable. Any compromise of ecosystem protocols triggers immediate and permanent punitive operational consequences.

- **Strict Information Confidentiality:** Any private student information, internal platform pricing models, algorithmic strategy metrics, or operational procedures discovered during your tenure must remain completely confidential. *(TBD: Final formatting regarding a standalone statement versus a formal signed digital NDA is currently being finalized by legal counsel.)*
- **Absolute Ban on Off-Platform Redirection:** Sharing personal phone numbers, email IDs, social media profiles, or third-party coaching references is strictly prohibited. Moving interactions outside the application results in a **permanent system ban** without prior warning or right of financial appeal.
- **Professional Demeanor:** Approach every session like an elite educational consultation. Maintain high patience, absolute respect, and continuous analytical focus.
- **Escalation Thresholds:** Frequent negative reports, student friction points, or trailing below specified rating parameters triggers an immediate performance evaluation path. *(TBD: Exact quantitative warning → suspension → removal logic chains are under operational review.)*
- **Platform Exclusivity Clause:** Mentoring on Mentivo is entirely exclusive. Mentors are strictly prohibited from providing concurrent paid mentoring, strategic guidance, or instant doubt-solving services on alternate platforms (including but not limited to Unacademy, PhysicsWallah, etc.) while holding active status here.

6. Support Channels & Issue Escalation

When unexpected issues arise, our founding and developer teams are directly accessible to provide immediate support to our network.

- **Critical Engineering or Financial Disputes:** For urgent bugs, structural call freezes, or wallet settlement anomalies, reach out directly via priority communication channels to the founders: **Abhiraj** or **Ayan**.
- **Peer & Community Ecosystem:** General platform announcements, dynamic product updates, feature rollouts, and peer support find their home in our dedicated **Mentivo Mentor WhatsApp Group**. You will be automatically added during your formal onboarding flow.

7. Institutional Recognition & Career Growth

Mentivo rewards outstanding guidance with prestige markers designed to help accelerate your personal professional resume outside the app ecosystem.

The “Verified IIT Mentor” LinkedIn Designation

Attaining **Tier 2 status** (Signature Tier — Rs. 15/min) unlocks your official corporate verification credentials. This allows you to formally feature your vetted academic advisory role on your **LinkedIn** professional profile, heavily validating your communication skills, leadership, and analytical mentorship traits.

Your trajectory with Mentivo is explicitly structured around your own merit. Scale your active hours, answer queries with unparalleled accuracy, build long-term advisory bonds with your students, and your per-minute baseline valuation will climb dynamically.
